```java
a) public int numWordsOfLength (int len) {
      int counter = 0;

      for (String s : myList) {
          if (s.length() == len) counter++;
      }

      return counter;

   }

B) public void removeWordsOfLength (int len) {
      for (int i = 0; i < myList.size(); i++) {
          if (myList.get(i).length() == len) {
             myList.remove(i);
             i--;
          }
      }
   }
```
